(54) CONTAINER

COPYRIGHT: (C)2002,JPO

(57) Abstract:

**PROBLEM TO BE SOLVED:** To provide a container having a pop-up function such that a user can easily grip a sheet body, as a use unit, and the sheet body as a use unit only can be surely drawn out without producing a slip.

**SOLUTION:** The container 10 includes a body 13 for storing sheet bodies P each including a large number of pieces of cloth or paper and a takeout part 20 including an opening, from which the sheet bodies each including unit number of pieces are successively drawn out one sheet body at a time. The takeout part 20 includes a plurality of elastic supporting means 22, 23, in each of which each forward end, being a free end, forms a gap in the opening, notched parts 24a, 24b provided in each elastic supporting means, and a guide part 25 for guiding the sheet bodies to the notched parts.
